
E1: three noise regimes, a = b = 1, A = 0.3 (sub-threshold), f0 = 0.01
D = 0.02, too little noise: SNR = 18.9 dB
output x(t)
clean signal (scaled)
x (dimensionless)
spectrum
f0 bin: 34 dB over background
PSD (1/Hz)
D = 0.12, near optimal: SNR = 28.1 dB
f0 bin: 37 dB over background
D = 1.0, too much noise: SNR = 20.7 dB
f0 bin: 21 dB over background
time (model units)
frequency (model units)
