
E8: aperiodic input, pulse amplitude 0.3 (A_c = 0.385)
peak cross-correlation (dimensionless)
noise intensity D (dimensionless)
spread over trials
peak cross-correlation
periodic optimum dU/2 = 0.125
SR peak r = 0.423 at D = 0.123
intra-well max r = 0.582 at D = 0.010
Before and after, first 3000 time units
x (dimensionless)
time (model units)
input pulses (scaled)
output at the SR peak D = 0.123, r = 0.423
output at the dip D = 0.040, r = 0.166
