E9: residence times, drive period T = 100, A = 0.3, optimum at D = 0.125
D = 0.04, too little noise
mean 79, undriven 1/r_K = 2301, odd/even 813
D = 0.125, near optimal
mean 40, undriven 1/r_K = 33, odd/even 3
D = 0.6, too much noise
mean 4, undriven 1/r_K = 7, odd/even 0
odd multiples of T/2
probability density (1/time)
residence time (model units)
residence time (model units)
residence time (model units)
