

E1: three noise regimes,  $a = b = 1$ ,  $A = 0.3$  (sub-threshold),  $f_0 = 0.01$

$D = 0.02$ , too little noise: SNR = 18.9 dB

$D = 0.12$ , near optimal: SNR = 28.1 dB

$D = 1.0$ , too much noise: SNR = 20.7 dB
