

E1: three noise regimes, $a = b = 1$, $A = 0.3$ (sub-threshold), $f_0 = 0.01$

$D = 0.02$, too little noise: SNR = 18.9 dB

$D = 0.12$, near optimal: SNR = 28.1 dB

$D = 1.0$, too much noise: SNR = 20.7 dB
